1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More particularly, claim 5 as now amended should not have the last word (compounds) underlined, as the word was previously present in the claim. Additionally, claim 5 appears to now be a defacto duplicate claim of amended claim 1.

4. Claims 1, 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dunshee taken either individually or in view of Stempel, cited as evidence of the state of the art, substantially for the reasons set forth in Paragraph No. 2 of Paper No. 20070122, together with the following additional observations. More particularly, the Examiner believes that Dunshee is not an anticipation only because the reference cites an enormous number of embodiments, none of which are believed to be specific examples of a suitable amount of water swellable superabsorbent particles that are expressly incorporated into the specifically claimed psa block copolymer mixture. However, paragraphs 0118-0120, in particular, teach that applicants' preferred superabsorbent particles [0119] are additives that can be included in certain embodiments into the adhesive composition, which is all that is required to render the claimed adhesive composition obvious. Thus, it is respectfully noted that applicants'

contention (Response, page 4, 4<sup>th</sup> paragraph) regarding the rejection of record is disagreed with for reasons both previously stated, as well as being supplemented by the above rationale. As regards applicants' contention (Response, paragraph bridging pages 4-5) that the adhesive bond performance of the claimed adhesives and accompanying articles has been shown to produce unexpected results such as are set forth in the specification in Table 2 on page 16 the Examiner must respectfully disagree. One of ordinary skill would only note that adhesive bonds are in the great majority of cases improved by the absence of lessening of water in the adhesive composition, which is what the superabsorbent particles are designed to do, and as to the alleged (and unsupported) arguments regarding the detachment of the adhesive bonds by the growth of the superabsorbent particles the Examiner believes that the rubbery block copolymer containing adhesives are quite capable of adjusting to compensate for such superabsorbent particle growth and resulting movement.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
